

Real Time Tracking

Track your objects in the field. View speed, location, engine status, etc. of the object.

Create Sub-Accounts

Create sub-accounts with limited rights for co-workers to track objects.

Create Geofencing Rules

Create rules for objects to stay in or out of a zone or route and get a notification when these rules are violated.

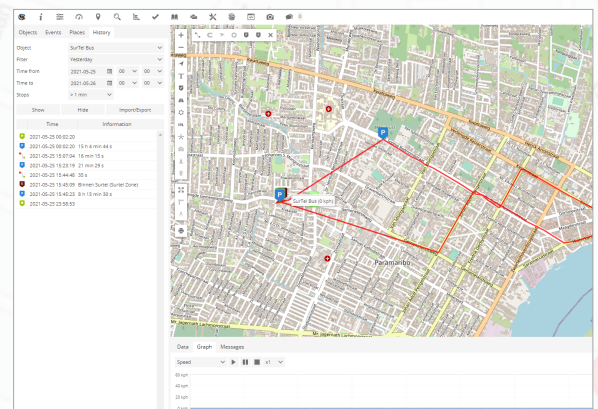

Automated Reports/Notifications

Get reports periodically via email and notifications for insurance, service, harsh acceleration, harsh braking etc. renewal via email, SMS or on-screen.

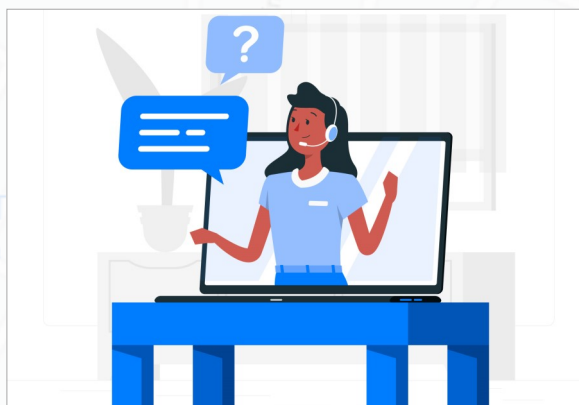

Other Features

- **View Object History:** Playback object routes and see movement, stop, idling statuses.
- **Driver Identification:** Get driver information with RFID cards or iButtons.
- **Starter Immobilizer:** In case of object theft, restrict the object from being started.
- **Unplug Detection:** Get notified via SMS when someone unplugs the GPS device.

Service

- **Installation:** Professional installation of GPS devices in Light Vehicles, Trucks, Excavators, etc.
- **Support:** Need help using our platform? Just call or send us a Direct Message.
- **Warranty:** 2-year no nonsense warranty. If it's broken we replace it.
